

Soh Li Min

Personal Statement

I'm a design graduate passionate about creating clear, human-centered content that supports user needs and business goals. With a foundation in UX/UI, research, and content strategy, I enjoy translating complex information into intuitive digital experiences. I'm eager to contribute to global teams where storytelling, usability, and business insight intersect.

Education

Bachelor of Fine Arts in Design Art, Nanyang Technological University, Singapore

Aug 2020 - Dec 2024

Relevant Courses: Product and Interface Design, Game Design, Designing Immersive Experiences, Visual Communication, 3D Production, Big Data Management and Business Analytics, Consumer Neuroscience, Business Finance, Business Law

Certification

Excel to MySQL: Analytic Techniques for Business Specialisation, Duke University (Issued Nov 2024)

Work Experience

Game Design Intern, Tatsu Works

May 2023 - Aug 2023

- Wrote and pitched content feature proposals ("NPC Shops" and "Settings"), integrating narrative consistency and UI clarity.
- Raised 3 improvements to the Unity engine workflow which were then incorporated, increasing efficiency in implementing quests and narrative.
- Provided QA testing and gameplay documentation support, identifying UX and content pain points.
- Analysed latest gacha games' content structures and player engagement patterns for presentation to design leads.

Freelance Translator / Content Localizer (English ↔ Chinese)

Aug 2022 - Mar 2023

- **Just Another Production (CNA Documentary - "Never Out of Reach")**
Transcribed 20+ hours of spoken Mandarin footage into written Chinese and translated into English subtitles for a Channel News Asia documentary on rural education in China. Ensured accuracy and cultural clarity in localized content.
- **Student Assistant to Prof. Ivy Yeh Hui-Yuan, NTU**
Translated academic archaeology papers between English and Mandarin. Supported cross-language research collaboration and publication.

Projects

Design Capstone Project - Halnymph

Dec 2024

- Designed an app prototype in Figma to support language learners through listening comprehension.
- Conducted user research via global surveys on language learning forums (30+ responses), synthesizing insights into user personas and content needs.
- Mapped user journeys and content goals to align product features with learner motivation, accessibility, and learning strategies.
- Built a competitive landscape analysis across language learning apps, differentiating by content philosophy, business model, pricing, and target users.

UI/UX Redesign of Google Scholar

Apr 2023

- Introduced smart cards at the top of results to highlight essential primary sources or landmark papers, addressing user struggles in finding foundational research quickly.
- Improved findability with redesigned filters for Open Access and Publication Year, guided by user research.
- Streamlined information presentation using smart cards with collapsible descriptions aiming to reduce information overload while still offering depth on demand.
- Boosted clarity of interactive elements (e.g. bookmarks, search refinement), and introduced new "Collab" and "History" functions to support research collaboration and session recall

Skills

Design - Typography, Editorial, UI/UX. InDesign, Illustrator, Photoshop, Figma, Touch designer, Font Lab 8, AI Tools, SparkAR

Media - Game Design, 3D Production, Immersive 360 & VR Experiences, Mocap. Unity, Unreal Engine 5, Maya, Motion Builder

Technical - C# Language, Python, Data Mining and Analysis, Excel, Tableau, MySQL

Languages - English (Native), Chinese (Native), Russian (B1)
